Education

- Master's Degree in Information Technology Management - Tecmilenio, 2024
- Bachelor's Degree in Computer Systems Engineer - ITNLD, 2022

Certifications

- IT Knowledge Management – Tecmilenio, 2023
- IT Business Solutions – Tecmilenio, 2024
- Database Security – Tecmilenio, 2024
- First Steps in Project Coordination – LinkedIn, 2023
- HTML5 and CSS3 – Platzi, 2016
- Python and Django – Platzi, 2016

Recognitions

- Highest GPA of the Class – ITNLD, 2023
- Academic Excellence – ANFEI, 2021

Diplomas

- Advanced Application Development Diploma – ITNLD, 2023

Professional profile

I am a software developer with over five years of experience in designing, developing, and implementing technological solutions in professional environments. I specialize in web and mobile applications, leveraging technologies such as .NET, Python, Java, Angular, and Flutter, with a focus on scalability, efficiency, and continuous improvement of systems. Passionate about adopting new technologies, I contribute to high-impact projects by combining strong technical skills with emotional intelligence and effective team collaboration, achieving outstanding results.

Work experience

Aduasis Logística (2020-2025)

Image Compressor
Optimized server storage usage, achieving a 40% reduction in space used. This improvement also enhanced image download times by 60%, benefiting the user experience in applications reliant on these resources.

Mobile App for Warehouse Yard Management
Implemented a synchronization system that enabled the app to function offline, reducing mobile data costs. This enhancement increased operational productivity by 30% by ensuring service continuity even in areas with limited connectivity.

Document Digitizer
Automated the digitization of customs documents, transforming a manual task into an automated workflow running in the background to interact with government web services. This solution streamlined the creation of electronic files, reducing processing times and significantly improving efficiency in customs procedures.

ITNLD (2018-2020)

Complementary Credits System
Design, development, and implementation of the complementary credits system for teachers.

Tutoring System
Design, development, and implementation of the system for managing academic tutoring.

Skills

- Web Development (HTML, CSS, Js, Java, Angular, and TypeScript)
- Mobile Development (Native iOS, Native Android, and Flutter)
- Databases (SQLite3, SQL Server, and MySQL)
- Web Services (REST and GraphQL)
- Optimization of Stored Procedures
- Emotional Intelligence
- Software Project Management and Administration
- Requirements Analysis
- Software Infrastructure Design Based on scalability, maintainability, and elasticity.
